PROJECTS

Enowa Website

During my Internship, I have worked on a real-time project called ENOWA. It was developed using PUG, SCSS and JAVASCRIPT. This experience helped me learn how to work on real-time code and write efficient, effective code.

News website

I have created a news website using Angular, complete with user authentication, allowing users to access and read news articles across different categories and languages.

Music App

I've created a dynamic music app with HTML, CSS, and JavaScript, offering seamless looping, playlist selection, track navigation, and real-time duration display for an enhanced user experience.

Movie App

I've crafted a ReactJS-powered movie application that utilizes an API, empowering users to effortlessly search for movies by their titles.
